Dear Dave,

The next **RFG 100 Insight Teleconference** on "**Executive Responsibility for False Security Corporate Filings and Breaches**" will be on **Tuesday, April 2nd at 8:30 AM EST**. Please let me know via a "yes" or "no" response to this message if you can attend, or if others from your organization should be invited.

Dr. Dave Chatterjee, World-Renowned Tech Thought Leader and Business Strategist at the University of Georgia, has researched and authored an article entitled "[Should executives go to jail over cybersecurity breaches?](#)" The article examines proposals to impose jail terms for corporate officers who knowingly mislead the shareholders and the public about corporate security in corporate filings. This Insight Teleconference examines these issues further and will provide an opportunity for attendees to ask questions about Dr. Chatterjee's findings and conclusions. This topic is also closely aligned with ongoing RFG 100 discussions and Task Forces looking at Aggregate Risk and "Security First" corporate cultures - areas in which Dr. Chatterjee will offer his guidance and perspective.

Those of you who were able to join us at December 6th's RFG 100 Digital Business Transformation Summit will recall Dr. Chatterjee's keynote on "Cornerstones of a High Performance Security Culture." Dr. Chatterjee had presented his findings from studying successful cybersecurity organizations and identifying and validating the organizational principles and methodologies essential for high-performing cybersecurity organizations.

This Insight Teleconference will cover:

- Some of the financial and individual remunerations and retributions required for intentional security-related declarations
- An examination of proactive indicators and metrics to quantify the security of sensitive information
- Cybersecurity preparedness using operational, organizational, and cultural programmatic paradigms

In addition to the article linked above, Dr. Chatterjee has put together a detailed Q&A abstract detailing issues he intends to highlight on the Insight Teleconference. [That Q&A PDF is attached here.](#)

An upcoming panel at the next RFG 100 Digital Business Transformation Summit on April 11th in NYC will deal with the ongoing topic of quantifying aggregate risk controls/norms/thresholds. Dr. Chatterjee's discussion should be considered prerequisite in participating in those discussions. That invitation is forthcoming this week and I hope you can join us. [Details of the Summit can be found here.](#)

This Insight Teleconference is set to occur on Tuesday, April 2th at 8:30 AM EST. Please let me know if you can join the debrief. Also, let me know if you and/or colleagues of yours can join us in person at the Summit on April 11th.

Thanks, and I hope you can participate in the call. **A simple "yes" or "no" response to this message will get you registered** (call-in details will follow) .

Regards,
CB
